

ANDERSON DE SOUZA ALVES

**Senior Software Engineer | Java | Spring Boot | Microservices | AWS | Kubernetes |
Software Architecture**

**Brasília, DF, Brazil | +55(61)995098662 | asouzamax@gmail.com
linkedin.com/in/andersonssouza-alves**

Professional with 15+ years of experience in software development, specializing in Java and Spring ecosystem. As a Senior Software Engineer, I excel in microservices architecture, legacy system migration, and performance optimization. My career includes projects in financial institutions (MetLife, Bradesco, Bank of Brazil), government (STF, BACEN), and technology companies. AWS Certified Solutions Architect with strong cloud computing, DevOps, and agile methodologies expertise, continuously pursuing innovation and technical excellence.

TECHNICAL SKILLS

Languages & Frameworks

Java 8/11/17 | Kotlin | Spring Boot | Spring Cloud | Quarkus | EJB | JPA | Hibernate | JUnit | Mockito | TDD | BDD | AngularJS | React.js | Node.js

Architecture & Design

Microservices | REST APIs | MVC | SOLID | Clean Architecture | Hexagonal Architecture | Domain Driven Design (DDD) | C4 Model | Design Patterns | Systems Design | GoF

Cloud & DevOps

AWS | Microsoft Azure | Docker | Kubernetes | Rancher | OpenShift | Jenkins | GitLab CI/CD | Terraform | Ansible | Prometheus | Grafana | Kibana | ELK Stack

Databases & Messaging

Oracle | MySQL | PostgreSQL | MongoDB | NoSQL | MariaDB | Redis | Kafka | RabbitMQ | Elasticsearch | Sybase

Tools & Methodologies

Git | Linux (Ubuntu/Debian) | Shell Scripting | Scrum | Kanban | Agile Methodologies | Functional Programming | Parallel Programming

EXPERIENCE

Senior Software Engineer | Exadel (MetLife) | São Paulo, SP

November 2023 - Present

- Led migration of legacy Java applications to Oracle, ensuring compatibility and optimizing performance
- Implemented performance tuning strategies that increased system responsiveness by 40%
- Collaborated with cross-functional teams to deliver regulatory-compliant solutions
- Automated repetitive tasks using shell scripting (bash, ssh) and monitored Linux servers

- Managed Docker and Kubernetes containers in Linux environment for high availability

Software Engineer | AM53 Smart Solutions | São Paulo, SP

June 2023 - October 2023

- Maintained and monitored middleware applications for acquisition systems, focusing on onboarding, clearing, and service fee management
- Developed with Java and Spring Boot, emphasizing batch processing and RabbitMQ integration
- Implemented Datadog for performance monitoring, configuring alerts and custom dashboards
- Identified and resolved bottlenecks to ensure optimal application availability and performance

Senior Full-stack Developer | Convergência (STF) | Brasília, DF

April 2022 - May 2023

- Developed innovative solutions for government agencies using Java backend and Angular frontend
- Led migration of Judiciary's legacy data platform to Elasticsearch, reducing query response times by 20% and increasing search volume by 45%
- Migrated legacy Java applications to modern architecture with Angular, Spring Boot, GitLab CI, and Kubernetes
- Created conceptual diagrams, data models, domain models, and roadmaps for secure, scalable systems

Software Engineer | NTT DATA (Bradesco) | São Paulo, SP

October 2021 - April 2022

- Developed full lifecycle REST microservices focusing on legacy infrastructure modernization
- Led core banking platform migration to microservices architecture, achieving 20% faster deployments and 15% cost reduction
- Implemented CDN strategy for static content, reducing average response time by 30% within 6 months
- Developed real-time analytics module, increasing operational efficiency by 15%

Software Developer | CTIS Tecnologia (BACEN) | Brasília, DF

September 2020 - October 2021

- Maintained, evolved, and monitored DICT platform, PIX arrangement (Bacen)
- Participated in architectural strategic planning and new feature development
- Optimized query performance by 35% using Elasticsearch
- Utilized Kafka, parallel programming, functional programming, BDD, TDD, CI/CD, Spring Boot, Docker, and Kubernetes

Systems Java Analyst | ECGE - Consultoria e Gestão Empresarial | Brasília, DF

February 2015 - September 2020

- Designed and implemented desktop applications (POS) using JavaFX and Spring

- Migrated legacy monolithic ERP system to microservices approach with Spring Boot and Docker
- Implemented Jenkins for build automation and component unit testing
- Increased application performance by 25% using Redis cache for frequently accessed data

System Analyst and Java Developer | Mirante Tecnologia (Sicoob) | Brasília, DF

November 2012 - February 2015

- Implemented, developed, and maintained credit risk limit system for SICOOB cooperatives
- Utilized JavaEE and Flex technologies for financial solutions development

Lead Software Engineer / Java Tech Lead | Fóton | Brasília, DF

November 2010 - August 2012

- Managed implementation/configuration and changes for financial institution projects
- Developed and maintained bank automation systems using Java/Swing
- Maintained corporate systems on Java J2EE platform

System Analyst | Cast Informática (Bank of Brazil) | Brasília, DF

August 2010 - March 2011

- Maintained and customized Bank of Brazil's Internet Banking portal developed on J2EE

Analyst and Java Developer | Link Data | Brasília, DF

March 2010 - August 2010

- Maintained and customized Web ASI tool (Integrated Public Management Solution), warehouse and shopping modules on J2EE

System Analyst | Politec | Brasília, DF

2007 - 2009

- Developed and implemented pilot project for Supreme Federal Court
- Architected, designed, and implemented applications using MVC frameworks JSF and Spring/JPA
- Implemented MVC Design Pattern for PHP systems
- Maintained legacy systems in Visual Basic and SQLServer

Software Developer - INEP | Poliedro | Brasília, DF

2006 - 2007

- Analyzed requirements for Censo2007 and CensoWeb systems (Java)
- Developed and maintained applications in PHP and Delphi with Oracle/PostgreSQL
- Participated in IDEB (Basic Education Development Index) and INEP Newsletter projects

EDUCATION

Software Engineering | Universidade Paulista (UNIP) | 2006 - 2009

LANGUAGES

- Portuguese: Native
- English: Full Professional Proficiency

CERTIFICATIONS

- AWS Certified Solutions Architect
- Java Mocks: Understanding Mockito
- Integration Testing: Automated SQL and DAO Testing in Java
- Design Patterns in Java II: Advancing Programming Best Practices
- SOLID with Java: Object-Oriented Programming Principles
- TDD and Java: Automated Testing with JUnit
